Education

BINUS University

Major of Artificial Intelligence

Sep 2024 – Present
West Jakarta, Indonesia

- GPA: 3.57 (out of 4.00)
- Relevant Coursework: Data Structures, Algorithm and Programming, Machine Learning, Deep Learning, Natural Language Processing, Computer Vision

SMA Kanisius Yos Soedarso Pati

Science Major

Jul 2021 – May 2024
Pati, Indonesia

- Achieved final grade of 88.09/100.00
- Ranked in the final top 10 students

Leadership

Freshmen Leader

First Year Program Binusian 2029

Aug 2024
West Jakarta, Indonesia

- Guided and assisted new students during university orientation activities.
- Helped freshmen adapt to academic and campus life at BINUS University.
- Coordinated with committee members to ensure orientation events ran smoothly.

Freshmen Partner

First Year Program Binusian 2029.

Sep 2025 – Jan 2026
West Jakarta.

- Mentored and guided freshmen students throughout their first academic year to help them adapt to university life and academic systems.
- Assisted freshmen by providing information, academic support, and communication regarding campus activities and regulations.
- Facilitated group discussions and maintained active communication to ensure freshmen engagement and well-being.

Academic Experience

Mathematic Competitions

Apr 2023 – Sep 2023
West Jakarta, Indonesia

- **Gold Medalist** — Olimpiade Siswa Indonesia 15 (OSI 15) 2023, organized by LKP Astikom and Deehati Global Loop
- **Gold Medalist** — Olimpiade Siswa Berprestasi Nasional (OSBN) 2023, organized by Lembaga Prestige
- **Finalist** — 2023 Mathematical Logic Competition, Soegijapranata Catholic University (Ranked 14th out of 200+ participants)
- **Participant** — Olimpiade Sains Nasional Tingkat Kabupaten (OSN-K) 2023
- **Participant** — Olimpiade Sains Pelajar Nasional (OSPN) 2023, organized by Lembaga Prestige

Projects

Lisentra — Transformer-Based Speech Emotion Detection | PyTorch, Transformers, Python

2025

- Developed an AI-based speech emotion detection system using Transformer architectures for audio classification.
- Processed and analyzed speech/audio datasets to identify emotional states from voice inputs.
- Applied deep learning techniques using PyTorch frameworks for model training and evaluation

RetinGuard — Diabetic Retinopathy Detection System | TensorFlow, EfficientNetB3, Python

- Developed an AI-powered medical imaging system to predict diabetic retinopathy risk from retinal images.
- Applied computer vision and deep learning techniques using TensorFlow frameworks for retinal image classification and analysis.
- Improved understanding of healthcare AI applications, image preprocessing, and model evaluation techniques.

CyberBullying Detection System | Transformers, PyTorch, Python

2026

- Developed an NLP-based system to detect cyberbullying content from textual data using Transformer architectures.
- Applied text preprocessing, tokenization, and deep learning techniques for text classification tasks.
- Trained and evaluated Transformer-based models using PyTorch for harmful content detection.

Skills

Programming Languages: Python, C, C++, SQL

Frameworks: TensorFlow, PyTorch, Transformers

Tools: Git, Jupyter Notebook

Languages: Indonesian (Native), English (Professional Working Proficiency)
